

<b>Name:</b>	Dr. Fumihito Aono	
<b>Affiliation:</b>	Natural ART Clinic Nihombashi, Tokyo , Japan	

Biography

**Mr. Fumihito Aono** is a director of research division of Natural ART Clinic Nihombashi since 2016. He graduated from Tokyo University of Agriculture in the faculty of livestock in 1984 and has started a scientific career in animal reproduction. He had worked for a private company as a researcher focusing on bovine IVF and cloning. His team had succeeded the production of the first embryonic cloned calves in Japan on 1993. He diverted away from animal reproduction career toward human reproduction in 1999. He worked for Kato Ladies Clinic in Tokyo Japan as a senior scientist and scientific director from 1999 to 2012. His research interests include round spermatid injection, oocyte rejuvenescence using cytoplasmic transfer technic, embryo and gametes cryopreservation, oocyte maturation in vitro and fertility preservation in cancer patients and sperm morphological analysis. He is a council member of Japan society of fertilization and implantation and is a board member of Japan society for fertility preservation.
